Uganda· Matches your timezone (8 AM to 12 PM PST or EST)

Full-stack software engineer with 3 years of experience in developing innovative web applications using JavaScript, TypeScript, React, React Native, Redux, Ruby, and Ruby on Rails. Proficient in HTML, and CSS, and experienced in working with Git, GitHub, Heroku, Netlify, and Restful APIs. Possesses strong problem-solving, teamwork, mentoring, and communication skills. Effective in remote pair programming and delivering high-quality work in a timely manner. A valuable addition to any team of remote engineers.

Years of exp. 3 year(s) of experience

Technical Skills You will be matched for these following skills:

Skill	Years of experience
✓ React4 years	4 years
HTML4 years	4 years
CSS4 years	4 years

Additional skills:

HTML5 4 years	CSS3 4 years	Ruby 2 years
Code Reviews 4 years	Git 4 years	RSpec 2 years
React Native 2 years	Ruby on Rails 2 years	JavaScript 4 years
Typescript 2 years	PostgreSQL 2 years	Redux 2 years
GitHub 4 years	Next.js 2 years	Fintech 3 years
Bootstrap 3 years	LESS 3 years	PHP < 1 year
WordPress < 1 year	Administration < 1 year	Access 3 years
Video 2 years	Communication 2 years	

Work History

Frontend Developer March 2021 - February 2023
Akiba Dital 1 yrs 11 mos

Insyts Web Seo

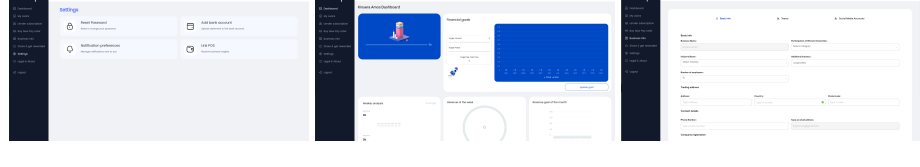

<https://app.insyts.ai>

- Worked as a Frontend Developer on the Akiba digital project, Insyts web application.
- Utilized React, JavaScript, TypeScript, NextJs, Antd, Bootstrap, and CSS to build the application.
- Studied the system's flow, data usage, and work processes to investigate problem areas.
- Served as a technical leader, supervising the work done by less experienced members of the team.
- Developed a set of dashboards that allow users to keep track of their loan application processes and link their bank account with Stitch or upload their bank statement manually.

The solution improved access to potential financing options for SMEs through subscribed lenders. It also provided the ability for SMEs to access multiple lenders by subscribing to them, giving them the freedom to subscribe to as many lenders as needed.

Typescript	React	JavaScript	Bootstrap	LESS	CSS	Next.js	Access

Microverse Code Reviewers Team

<https://github.com/bigmosi>

- Mentored and provided technical support to junior web developers in Ruby, Ruby on Rails, JavaScript, HTML, CSS, React, and Redux.
- Conducted code reviews and provided best practice guidelines to ensure code quality and overall performance.
- Improved code organization and proposed optimizations to enhance project quality.
- Advised mentees on maintaining motivation to ensure longevity in the program.
- Utilized technologies such as Ruby, Ruby on Rails, JavaScript, HTML, CSS, React, and Redux to effectively provide technical guidance to multiple junior developers.

Successfully collaborated with Microverse projects to enhance code guidelines and requirements, resulting in improved project quality. Demonstrated effective communication skills by providing specialized technical advice and guidance to multiple junior developers over 1:1 video calls and chats.

Car Book

<https://github.com/bigmosi/carbook-ui.git>

This project is made for the reservation of cars. If you're preparing for a special day/event and you want a cool car for it this website is the best place for you. If you have a car and want to make some extra money from it, you can add that to our website and others will be able to reserve it!

Main features of this website are:

- Users can see details of all the cars.
- Users can reserve a car for a special day (a car that hasn't been reserved yet)
- Users can add their own cars and remove them if they want to.

- The organization witnessed an increase in the number of members of the community engaging with the network, this was not the case previously.

Frontend Developer April 2019 - March 2022
Akiba Digital 2 yrs 11 mos

Insyts

<https://www.akibadigital.com/>

- Designed and developed a responsive and intuitive web application for Akiba digital called Insyts using React JavaScript, TypeScript, NextJS, CSS, and HTML programming languages.
- Worked on both the front-end and back-end, creating custom post types, custom layouts, taxonomies, and plugin development.
- Utilized Git for source code version control.
- Studied the system's flow, data usage, and work processes to investigate problem areas and served as a technical leader, supervising the work done by less experienced team members.
- Developed a set of dashboards in the Insyts application that allows users to keep track of their loan application processes and link their bank account with Stitch or upload their bank statement manually.

The solution improved access to potential financing options for SMEs through subscribed lenders and provided the ability for SMEs to access multiple lenders by subscribing to them, giving them the freedom to subscribe to as many lenders as needed. This resulted in an increase in revenue by 30% in the year 2021-2022 for Akiba Digital, by increasing the number of clients and prospective clients interacting with different banks through the Insyts application.

Side Projects

Budget App

<https://github.com/bigmosi/rails-budget-app.git>

Built a mobile web application called Budget App using Ruby on Rails.

Ruby	Ruby on Rails
------	---------------

Covid19 Metrics

<https://bigmosi-covid19-metrics.netlify.app/>

This web application provides statistical insights on COVID-19 cases around the world. The application allows users to filter through the information by different countries.

Redux	HTML	React
-------	------	-------

Space Traveler's Hub

<https://github.com/bigmosi/Space-travelers-Hub.git>

This is a web application for a company that provides commercial and scientific space travel services. The application will allow users to book rockets and join selected space missions.

Redux	HTML5	CSS3	React
